

MANAGED SECURITY SERVICES FOR SMALL AND MEDIUM-SIZED BUSINESSES

Small and medium-sized businesses (SMBs) are under pressure to compete with much larger companies that also have much larger budgets, all while providing the same, if not better level of customer service. And while a data breach can cost big organizations millions of dollars, for a smaller company such incidents could mean going out of business.

As cyber security becomes a requirement for businesses of any size, implementing a solution can be cost prohibitive for most SMBs. A Managed Security Service (MSS) solution provides the best in terms of network and data security protection, as well as being affordable to organizations of almost any size. In addition to protecting business operations and customer data, MSS can also help organizations comply with different regulatory compliance requirements.

With a comprehensive portfolio of information security services, led by its world-class, proprietary technology platform ArkAngel, Hitachi Systems Security Inc. is helping organizations around the globe fulfill their growing needs for effective cyber security solutions.

Hitachi Systems Security Inc.'s MSS offering is a customized and cost-effective security solution specifically designed to meet the unique needs of small and medium-sized businesses.

HITACHI SYSTEMS SECURITY INC.'S MANAGED SECURITY SERVICE OFFERING HELPS SMBS:

- Detect and prevent cyber attacks
- Manage network and applications vulnerabilities
- Comply with regulations
- Work with security specialists
- Get the best protection possible at a fraction of the cost

INTRUSION DETECTION AND PREVENTION

Intrusion Detection and Prevention Services are customized and well tuned to your own network and to the latest cyber threats. Our team will help you sort through the thousands of alerts generated by your devices to deliver effective and timely protection against real threats.

VULNERABILITY SCANNING

Hitachi Systems Security Inc.'s Vulnerability Management Service leverages over 15 years of optimized security technology and expertise. Our service will perform both internal and external scan audits across your critical IT assets including network devices, servers, Web applications, and databases to identify vulnerabilities and help you patch them.

SECURITY LOG MONITORING

Hitachi Systems Security Inc.'s Log Monitoring Service retains, correlates and analyzes logs and alerts across all security devices and critical IT assets. Our around-the-clock team of security experts will sort through the millions of generated logs to identify threats and anomalies and respond to threats immediately.

SECURITY POSTURE REPORTS

Gain access to quarterly reports summarizing your security posture and the steps you need to take in order to improve your security posture.

UNIFIED SECURITY PORTAL

Hitachi Systems Security Inc.'s ArkAngel portal offers consolidated security management of all your cyber security operations. Review your security reports, manage and respond to security incidents and threats, review your security and compliance policies, and interact with our security experts. ArkAngel is your one-stop IT security solution in a highly secure environment.

SUMMARY

Hitachi Systems Security Inc.'s MSS is specifically designed to address the cyber security needs of small to medium sized businesses. MSS offers advanced protection of your most critical IT assets as well as corporate and customer data. MSS also covers a host of regulatory requirements, simplifying your path to compliance with various vertical-specific requirements such as PCI DSS compliance.

MSS is priced to make it accessible to SMBs that are looking to implement cyber security measures without breaking the bank. MSS offers you the best in cyber security technology by protecting you from malicious cyber intrusions and attacks at all times. Our solution paired with our world-class security expert team extends your IT staff at a fraction of the cost of traditional cyber security solutions.
