Blainville, Quebec – October 2nd, 2023

Hitachi Systems Security and YULCOM Join Forces to Enhance Cybersecurity and Digital Transformation Solutions in Quebec and globally.

Hitachi Systems Security, a leading cybersecurity consulting firm, is pleased to announce a strategic partnership with YULCOM, a dynamic digital transformation and IT consulting firm. This collaboration combines the expertise of both organizations to provide comprehensive cybersecurity and digital transformation solutions to clients in Quebec and beyond.

As a security-first global consultant, Hitachi Systems Security helps businesses establish a proactive and resilient security posture that protects their critical assets, helps organizations comply with applicable regulations and confidently execute a digital-first business growth strategies.

YULCOM brings a wealth of knowledge in digital transformation, IT consulting, and cloud solutions. With a focus on innovation, YULCOM assists businesses in leveraging technology to drive growth, streamline operations, and enhance customer experiences.

Key Benefits of the Partnership

Holistic Solutions: Clients will have access to a one-stop-shop for comprehensive cybersecurity and digital transformation services, ensuring their IT environments are secure, efficient, and adaptable.

End-to-End Support: The partnership covers the entire spectrum, from assessing an organization's cybersecurity posture to implementing digital transformation strategies that align with business goals.

Customized Approaches: Each solution is tailored to the unique needs and challenges of the client, ensuring a personalized and effective approach.

Expertise and Innovation: Clients benefit from the combined expertise of two industry leaders who are at the forefront of cybersecurity and digital transformation.

Enhanced Resilience: The partnership helps organizations build cyber resilience, enabling them to respond effectively to cyber threats and disruptions.

Matt Castonguay, Chief Revenue Officer at Hitachi Systems Security, stated, "We are excited to partner with YULCOM, a company known for its innovative approach to digital transformation. Together, we will empower organizations to navigate the complex landscape of cybersecurity and digitalization with confidence."

Youmani Jérôme LANKOANDE, President at YULCOM, commented, "This partnership aligns perfectly with our commitment to help businesses harness the power of technology for growth. By integrating cybersecurity into our services, we ensure our clients are secure in their digital transformation journey."

Secure Digital Transformation by Design

Secure digital transformation by design refers to the intentional and strategic approach of incorporating security measures and considerations at every stage of a digital transformation initiative. Digital transformation involves the integration of digital technologies into various aspects of an organization's operations, processes, and services to improve efficiency, agility, and customer experiences. However, this transformation also introduces new risks and vulnerabilities that can be exploited by malicious actors if not adequately addressed.

By incorporating security considerations into the design and implementation of a digital transformation initiative, organizations can reduce the likelihood of security breaches, protect sensitive data, and build trust with customers and partners. Secure digital transformation by design is an essential approach to ensure that the benefits of digital transformation are not compromised by security vulnerabilities and threats.
